

To Whom it May Concern,

I have had the opportunity to work with Jason Engberg managing his hospice and palliative duties under Prema Innovative Therapies. He is consistently enthusiastic, positive and brings a personal warmth engaging with patients and staff alike.

Jason has been dependable, flexible and always has the patients needs above his own. His commitment to the quality and care of his patients is a great asset. Additionally, Jason's ability to chart and communicate to caregivers and case managers is extremely helpful in managing the ongoing care and expectations to the patient, family and support staff.

I would not hesitate in recommending Jason for bodywork, particularly for elders and especially with the Hospice and Palliative population. He has been a valued member of my team.
